

Pennsylvania Water Environment Association

PUBLIC TOURS SURVEY

The Public Education Committee of the Pennsylvania Water Environment Association has developed this survey to assist in identifying water and wastewater facilities which offer public tours. Citizen outreach is vital for educating the public:

- 1) On the important role our profession has with respect to health and safety and being first responders in an emergency situation;
- 2) To realize the importance of water quality; and
- 3) To understand the need for maintaining current systems as well as, replacing outdated infrastructure and delivery systems.

Plant tours are an excellent opportunity to educate current civic leaders (and future leaders) on the importance of providing quality water and maintaining a quality environment, in addition to how both impact the local economy and lives of citizens.

The results of this survey will provide a searchable database that can be used by teachers, Scout leaders, etc. to locate a facility near them which offers public tours. By participating, you will be providing a valuable education tool to members of your community.

Thank you for your participation!

Name of Facility: _____

Type of Facility:

Water

Wastewater

Both

Other (specify) _____

Address of Facility:

Street Address _____

City _____

Does Facility Offer Public Tours?

Yes

No

Type of System: _____

Size of System (MGD): _____

Date of Last Expansion/Upgrade: _____

When Tours are Offered:

Normal Work Hours

Weekends

Evenings

Seasonal

**Required Notice or
Reservation Requirement:** _____

Minimum Size of Tour Group: _____

Maximum Size of Tour Group: _____

**Any Restrictions?
(i.e., parking, traffic, security)** _____

Contact Name for Arranging Tours: _____

Contact Telephone: _____
