WEF shares 2016 StormTV Project participants

The Water Environment Federation (WEF) this month posted the participants in its fifth annual stormwater video project. For 2016, the StormTV Project changed from a competition to an exhibition, featuring 29 submissions.

The project recognizes and highlights the work of stormwater professionals. It collects and shares videos of innovative stormwater programs, practices, products, and public outreach as well as builds a library of videos to share. [Read more](#)

Storm News

Chicago gives away trees to prevent flooding, help city wildlife

Pests and extreme weather events have destroyed approximately 13 million trees in the Chicago area. To help remedy that the Metropolitan Water Reclamation District of Greater Chicago (MWRD) staff began distributing more than 14,000 oak tree saplings. The distribution is part of Restore the Canopy, Plant a Tree in Cook County, Ill. [Read more](#)

DC Water issues first of its kind bond to fund DC Clean Rivers Project

In September, DC Water (Washington, D.C.) issued the first Environmental Impact Bond (EIB) in the U.S. DC Water will use the proceeds to fund the initial green infrastructure project in its DC Clean Rivers Project, which a \$2.6 billion program to control stormwater runoff and improve the district's water quality. The EIB offers a new type of financial instrument to fund environmental capital projects. The EIB ties financial payments to environmental outcomes. [Read more](#)

New York City awards Dewberry contract to improve green infrastructure

The New York City Department of Design and Construction (NYCDDC) awarded Dewberry (Fairfax, Va.), a contract to provide design services for green infrastructure improvements in New York City.

The contract includes preparing plans using the New York City Department of Environmental Protection's (DEP) standard design for

- right-of-way bioswales,
- right-of-way rain gardens, and
- stormwater green streets.

StormWater Management

Advances in stormwater pollutant removal from industrial sites

Stormwater discharges from three linked industrial sites in the Port of Tacoma are treated by three different proprietary, gravity-based solutions to meet each location's unique stormwater characteristics and operational needs as well as comply with stringent regulations required by the U.S. state of Washington.
