

YP Connections

Volume 9 Issue 2: Second Trimester 2015

YP CONTINUED SUCCESS

By Haley Falconer, City of Boise

Wow! I cannot believe it has been two years since I started as the SYPC Chair. As I look back on what we have accomplished, I am very proud of our volunteers, this committee, and our organization. The SYPC continues to build strong programs that reinforce the mission and vision of WEF and provide a welcoming and supportive platform for students and young professionals to be involved.

One of the goals set two years ago was to grow the number of active SYPC members. With the help of our strong subcommittees, I am proud to see an increased number of SYPC volunteers and leaders. We have several new subcommittee leaders and subcommittee volunteers helping continue enthusiastic delivery of our programs! The creation of several student chapter toolkits by the Student Outreach Subcommittee is a great example!

Growth and evolution of the SYPC programs is continual. At WEFTEC, the Service Project and Water Palooza gets bigger every year, we have new Member Associations (MAs) and student teams participating in the Student Design Competition, the breadth of the Career Fair continues to grow, and we have created toolkits to help universities and MAs start, build, and maintain student chapters. These amazing activities continue to develop and advance as we understand how we can better serve WEF and our student and YP members. I cannot wait to see where these programs go in the next several years.

As I look back on my first 9 years of involvement in WEF, there are two things I love most. I have made some great friends through WEF, and as volunteers, we couldn't ask for better people and friends with whom to be working side by side. Through this shared vision and understanding of the value of water, we are able to accomplish major things for our industry and have tons of fun along the way! Second, I love that we do good work and get things done.

For our long time volunteers, thank you! Please continue to be involved and find areas to challenge and inspire you. If you are new to the committee or want to learn more, thank you as well—for you are our future leaders. Please ask questions and find opportunities. *(Continued on p. 10)*

WEFTEC 2015 S&YP EVENTS

By Darrin Harris, Black & Veatch

Opportunities abound for students at WEFTEC 2015! Whether it's the Student Design Competition, Career Fair, Student Lounge, Students and Young Professionals Committee (SYPC) Meeting, Annual Student Chapter Meeting, or the various evening social events, attendees have a lot of options specifically tailored for them at this year's event.

University Student Lounge

The University Student Lounge runs September 27 - 29 and offers students their own place to meet and network with fellow students. The student lounge is hosted by SYPC sponsors. Complimentary light lunch and refreshments are provided from 11:30am - 1:30pm on Sunday and Monday.

Annual Student Chapter Meeting

The Annual Student Chapter Meeting will be held on Monday, September 28 from 9:30am - 10:30am. This meeting offers an opportunity for student members and their supporters to discuss successes and challenges.

SYPC Meeting

The SYPC Meeting will directly follow the Annual Student Chapter Meeting on Monday, September 28 from 10:30am - 12:30pm. This meeting provides a forum for students, academics, young professionals, and Member Association Leaders to discuss

how WEF programs are helping shape opportunities for students & young professionals.

SYPC Networking and Career Fair

This year's SYPC Networking and Career Fair will be held on Monday, September 28 from 1:00pm - 4:00pm. This event offers an opportunity for companies and utilities to recruit some of the best and brightest students in the water industry. Firms from the U.S. and Canada will be on hand to meet informally with students and pre-schedule interview opportunities. See the WEFTEC website for a list of companies scheduled to attend this year's event.

Student Appreciation Night

There are two major social events for Students & Young Professionals at WEFTEC. The first is the Black & Veatch Student Appreciation Night on Monday, September 28 from 5:00pm - 7:00pm at New Line Tavern (201 North Clinton Street). This annual event provides students an opportunity to network with peers and meet leaders within Black & Veatch.

YP Networking Reception

The WEF Young Professionals Networking Reception will be held at Carnivale (702 W Fulton St. Chicago) from 8:00pm - 11:00pm. This reception offers a fun-filled evening of conversation and peer-to-peer networking. Your WEFTEC badge is required.

This reception is made possible by contributions from corporate sponsors.

Jammin' 4 Water

The 3rd Annual Jammin' 4 Water event will be held this year at WEFTEC. The event occurs on Saturday, September 28 at Park West (322 Armitage Ave.) and raises money to support water charities, including long-term maintenance of the WEF Community Service Project. We hope you will join us at this fun event - for a limited time, there are \$15 SYPC tickets available (the regular price is \$50) so get your tickets now.!

<http://www.jammin4water.org/>

YP Events Schedule

A copy of the WEFTEC YP schedule is provided at the end of this Issue.

Water sector professionals perform during Jammin'4Water at WEFTEC. Photo courtesy of David J. Kinnear.

THE PERSHING CULTIVATION PROJECT: GROWING GREEN GARDENS AND YOUNG MINDS

By Tim Moran, NIBCO Inc., Service Project Chair

The 8th annual WEF Community Service Project will be held at John J. Pershing East Magnet School on Saturday, September 26th and will consist of transforming a portion of the school grounds into a learning garden that will serve as an interactive tool for the school's K-8th grade students to learn about water, the environment, and green infrastructure. We will be building a seating area for an outdoor classroom, a rain garden to capture and infiltrate stormwater runoff, and a large garden filled with native prairie grasses and flowers. Teachers will also be provided with lesson plans to accompany the learning garden. This is an opportunity for water professionals to participate in a green infrastructure project, engage the community about the value of water, and leave the WEFTEC host city greener than we found it.

WEF will provide transportation (**Departing WEFTEC HQ Hotel at 8:30am SHARP!**), t-shirts, lunch/refreshments, and all necessary equipment; but, **we need the volunteers to provide the heart and soul of our mission!** Volunteers work side-by-side with SYPC committee leaders, WEF board members past and present, Pershing students and staff and Bronzeville neighborhood residents. In the afternoon we will break for the ribbon cutting ceremony with WEF delegates and city officials!

If you would like more information, go to <http://weftec.org/syp/>. WEF would like to thank the YP Sponsors: AECOM, ARCADIS U.S., Bentley Systems, Black & Veatch, Brown and Caldwell, Carollo Engineers, CDM Smith, CH2M, Greeley and Hansen LLC, Hazen & Sawyer, HDR, Vaughan Company Inc., Xylem Inc. | Donors: Parsons, Chemtrol, The Lubrizol Corporation, Central States WEA, Illinois WEA, Apex Engineering Group, AE2S, Christopher B. Burke Engineering, Duperon Corporation, Engineering America Inc. Entex Technologies, EOSi, FKC Screwpress, Wigen Water Technologies, Engineering Enterprises Inc., EPC Consultants, Inc. | InKind Donors: Metropolitan Water Reclamation District of Greater Chicago, Christy Webber Landscapes, Trinity Landscape of Northern Illinois Inc., Midwest Groundcovers, LLC, USA BlueBook, City of Chicago Department of Water Management, Northwind Perennial Farms, Gerdes Wholesale Nursery, Lake Street Supply, Dahme Mechanical

WATER PALOOZA

By Michael Quamme, Apex Engineering Group, Water Palooza Co-Chair

The 3rd annual Water Palooza education event will take place at John J. Pershing East Magnet School. 800 elementary and middle school age students from Pershing and 5 other Chicago schools will take part in the day long event. Students will visit 18 booths representing 15 organizations from Chicago and around the country where they will learn about the value of water and how to become stewards of their own water environment through hands on and demonstrative activities. Representatives of the 4th Ward Alderman's office will also be in attendance to interact with the students and share information regarding what is happening in the Ward as well as information on the area's water and environment.

Water Palooza is free to all participating schools and organizations thanks to the generous donations of SYPC sponsors. In addition, WEF will be providing numerous handouts including Water's Worth It pins, World Water Monitoring Day book bags, WEF coloring books, wastewater collection folding maps, and WEF stuffers for students to bring home and share with parents so the whole family can become stewards of their water environment.

STUDENT DESIGN COMPETITIONS

By Lauren Zuravnsky, Greeley and Hansen, Student Design Competition Chair

8:00 am - 6:00 pm, McCormick Place N229

The Student and Young Professionals committee is looking forward to another year of milestones for the **WEF Student Design Competitions!** In Chicago at WEFTEC'15, **14 student teams from 12 different Member Associations are participating in this exciting event.** This is the largest group yet! The teams are grouped into two competitions, one for wastewater treatment design and the other for water environment design. The competitions will be held back to back on **Sunday, September 27th.**

All WEFTEC attendees are encouraged to attend the competitions, in whole or in part, and to bring a friend. The future leaders of our water industry will be presenting their big ideas for tackling current challenges in wastewater treatment and the water environment. This is a great opportunity to support the team from your Member Association and to recruit new professionals for your organization or WEF Committee.

The WEF Student Design Competitions are intended to **promote "real world" design experience** for students interested in pursuing an education and/or career in water/wastewater engineering and sciences. Please share this opportunity with schools you are associated with as a great way for students to get involved in the water industry. The competitions are a wonderful way to **jumpstart a career and initiate contact with water professionals.** Most Member Associations host a regional level competition in the spring, which is also great way to encourage student participation at the regional level. Wining regional teams are typically supported to take the next step to compete at WEFTEC.

Guidelines for the WEF® Student Design Competition are available on the WEF website (<http://wef.org/PublicInformation/page.aspx?id=136>). Interested students are encouraged to review the guidelines in their entirety. Member Associations interested in starting a student design competition are encouraged to adopt a version of the guidelines for their own use and check out the Toolbox available online as well.

AZ WATER ACTIVITIES

By Gretchen A. Baumgardner, City of Mesa

The AZ Water YP committee had several duties at the Arizona Annual Conference: Student Poster Contest, YP Session, Conference BBQ Raffle, Fresh Ideas, administering the Student Scholarships, and any other small tasks that were needed around the conference. We had a great time with all of our activities. The YP committee is able to do so much because of its enthusiastic and ready-to-help members.

There were 13 Students involved with the Poster Contest at this year's conference and three winners; Maria Campillo (U of A), Heather Stancl (ASU) and Shakira Hobbs (ASU).

Our YP committee gets a 1.5-2 hour session at our annual conference. This year we focused on a panel discussion with distinguished Water Policy Professionals and asked, "What future challenges will be encountered as the next generation of water professionals take the reins and responsibility, and become the stewards of Arizona water planning?"

Ameron Manufacturing Facility tour group.

The YPs also administer the Fresh Ideas Contest. YPs that entered this contest present their topic at the conference as they normally would. However, audience members are given

score cards to rate the contestants (1 to 5) using a set of criteria. The winner of this contest is sent to the AWWA Annual Conference (ACE), this year held in Anaheim CA. The 2015 winner was Rebecca Hamel who is the Town of Gilbert's Water Quality Supervisor. Rebecca presented her topic titled "A Proactive Approach to Water Quality Assessment, Corrosion Control, and Plant Operational Optimization".

AZ Water YP committee member Greg Go (Ferguson) organized a manufacturing facility tour at the Ameron plant in Phoenix. The YPs invited others from the Distribution and the Construction Committees to come along. We had a great turn out and a fun time learning about Wrapped Concrete Cylinder Pipe.

Vice Chair Lourdes Lopez organized a Habitat for Humanity build day sponsored by her company (PCL) in which several YPs, including Water-For-People Committee Members, were able to help out.

YPs at a Habitat for Humanity build sponsored by PCL.

KY TN CONFERENCE ACTIVITIES

By Michelle Hatcher, City of Franklin

Past KY/TN WEA YP Chair, Incoming WEF SYPC Chair

Another Kentucky Tennessee Water Professionals Conference is in the history books, and we had a great time in Covington, Kentucky!

This was our second Water For Life event. We held this year's event at Newport on the Levee and on Riverboat Row on July 26. It was another fantastic event with over 400 kids making their way through all of our educational booths and learning the value of water, how to conserve water, and different aspects of water quality. We also had surprise visits from an alligator and turtle from the Newport Aquarium. It was a hot but awesome day!

This year's YP speaker was Mark Fisher, Sustainability Coordinator from the Cincinnati Zoo and Botanical Garden. Mark spoke about the sustainability initiatives the zoo has recently undertaken to conserve & reuse water, improve their local community, and protect animals by giving them a better quality of life. It was a great session and discussion on how sustainability can impact even the smallest things!

After the technical session, seasoned professionals & YPs walked from the convention center to The Gruff, the location of our YP social. The Gruff opened up since our last event in Covington, so we were excited to be able to offer a local restaurant flavor with local beverage selections. This networking hour before the member celebration proved to be another hit as we had about 100 people make their way through the reception, sampling the local fare and staying hydrated.

Next year's conference will be held in Knoxville, Tennessee and will be another great event for Water For Life and our YP activities. For more information on our events, email michelle.hatcher@franklintn.gov.

MWEA RAIN GARDEN

By Katie Maschmann, Burns & McDonnell

The YPs of the Missouri Water Environment Association (MWEA) have organized and participated in a number of activities over the past several months. Recent networking and recruiting activities include a local distillery tour in Lenexa, KS and a tailgate at a Kansas City Royals baseball game.

One of our more unique activities was a tour of a green infrastructure initiative called the Middle Blue River Green Solutions Pilot Project. This project was undertaken by the City of Kansas City, Missouri to investigate the use of green infrastructure in a residential neighborhood as a solution to reduce combined sewer overflows. City employees led a tour of the project area, which spans over 100 acres. This tour was a great opportunity for YPs to learn from the City about a still-evolving topic in water and wastewater and see the project area first-hand. We had a great turnout for the event, despite the warm day in July. More information about this project and the many initiatives of Kansas City Water Services can be found at:

<https://www.kcwaterservices.org/>

YPs learning about cascade rain gardens at the Middle Blue River Green Solutions Pilot

NJWEA “THE FUTURE OF THE FIELD”

By Jennifer Loudon, Raritan Township Municipal Utilities Authority, WEF Lab Practices Committee Vice-Chair, NJWEA YPC Co-Chair

NJWEA hosted its 100th Annual John J. Lagrosa Conference and Exhibition in Atlantic City. A highlight of every conference is the Student and YPs Session, and this centennial year was extraordinary. The students and YPs had the honor of starting the day with a private Meet & Greet’ with some of the leaders in our industry. Mr. Rick Eustace (NJWEA President) and Mr. Paul Bowen (WEF President-Elect) welcomed everyone, and afterward, the mic was turned over to a very special guest- Mr. George Hawkins, General Manager of DC Water.

Mr George Hawkins speaking about the current state of the industry and how young people are the future innovators and leaders.

How They Succeeded

The YP Workshop this year hit a personal note with an interactive Q&A panel. Here, the students were given an up close and personal glimpse into how some

members broke into the industry. Both YPs and Experienced Professionals (EPs) shared their stories and insight into the wonderful world of wastewater. In particular, there was a special focus on alternative education/ career paths. Some people travel in a straight line to get here and others take the scenic route, but it’s a great industry to work in no matter your travel arrangements.

“Take the opportunities that are in front of you and learn/grow from them all.”

YP Speaker Challenge

The annual YP Speaker Challenge highlights YPs presenting in other technical sessions by providing a forum for them to get feedback on their presentations as well as earn monetary prizes. This year, we had 12 speakers in 8 different sessions. A main focus for students is the annual Student Research Poster Competition.

Lights Out.. and Beers Too!

Once the lights went down and the ties were loosened, the YPs spearheaded SLUDGE BOWL XXVI, which consisted of a t-shirt giveaway, karaoke and the 1st Annual Beer Pong Tournament. There was an impressive turnout of 18 teams that participated for the rights to the title of Beer Pong Champions. The entire Conference was a great success and will hopefully continue to become bigger and better in years to come.

The Real Jersey Shore

Beer Pong Tournament.

YPs from all across the state joined Central Jersey Stream Team (CJST) to clean up the Raritan River. There was a great turnout, even with the rain, and a bunch of junk was pulled out along the mile-long stretch of river. The YPs wrapped up summertime festivities with a networking happy-hour down in Belmar.

Jersey shore cleanup.

NWEA “BACK TO SCHOOL”

By Brittany Radke, MWH

The NWEA YPs participated in a student talk at Green Valley High School this past May. The student talks are intended to address students interested in the STEM related fields and to enlighten them about the opportunities available to them within the water industry. The YPs visited Mr. Panik’s AP physics students and discussed various careers such as water/wastewater engineering, treatment plant operations, and water laboratory research. The presentation culminated with a hands-on activity where students were able to create their own water filtration system using a coffee filter, gravel, sand, and activated carbon to remove food coloring from water.

Overall, the student talk was a huge success! The students were engaged and excited about the information presented. Students noted that a lot of what was discussed during the presentation was new to them and they yearned to learn more. Mr. Panik followed up the presentation with an email saying that although the presentation was only given to one of his classes, students attending his class later in the day were talking about what their friends had learned from the talk earlier in the morning.

Based on the feedback from this first talk, it is evident that these types of interactions with the community are needed and positively embraced. The YPs are excited for the beginning of the new school year so they can start preparing for the fall semester presentation.

WCWEA BOWLING

By Scott MacIntosh, City of Edmonton

With a loud bang and a low rolling rumble, the Edmonton YP chapter of the Western Canada Water Environment Association (WCWEA) proudly hosted their first fundraising event this year. An auspicious beginning for the local chapters’ new members and a sign of more water related events to come. Participants spanned a wide range of backgrounds from students to public and private water sector professionals and related industry members.

Between the free food, team bowling and sponsor donated prizes, the event created the perfect environment for promoting our organization as well as supporting a great cause. The Water for People (WFP) foundation supports the development of water and sanitation solutions to those who need it most, and the admirable work they do was proudly promoted by our members.

This event has spurred increased demand for future events and served as an example of what the organization stands for; getting people thinking, discussing and caring about water. From local concerns to global issues, clean water is the earth’s most precious resource. We will continue to encourage people to think about their dependence on water at a personal and global level, one event at a time.

NYWEA CENTRAL ACITIVTIES

By Jonas Balistreri, Arcadis

Status of the Chapter's Young Professionals

The Young Professionals of the Central Chapter of NYWEA (Syracuse, NY and surrounding area) participated in a number of activities during the second trimester of 2015. We have 28 active participants in our Young Professional Committee from various local companies and municipalities.

Minoa WWTP Tour in Minoa, NY

On June 25, the Central Chapter attended a Tour of a small WWTP in Minoa, NY that is known for use of cutting edge technology to treat wastewater using sustainable methods including three distinct biological reactors used for wastewater treatment. More information can be found at:

http://www.syracuse.com/news/index.ssf/2012/09/willpower_wastewater_treatment.html

Anaerobic Farm Digester Tour in Linwood, NY

On July 9, the Central Chapter of NYWEA teamed with the Genesee Valley Chapter to tour an anaerobic Digester at Noblehurst Farms in Linwood, NY. The farm uses cow excrement and grocery store waste to create methane which is used for their heating and electrical needs. More information can be found at:

<http://www.linwoodag.com/noblehurst.html>

Central Chapter Picnic in Syracuse, NY

On August 14, the Central Chapter participated in their annual picnic which was highlighted by a YP vs. EP (Experienced Professional) volleyball challenge. This year, the YPs were able to win! The event was catered by Limp Lizard BBQ and door prizes were distributed to all attendees. NYWEA used event proceeds to raise money for the scholarship committee.

Rosemond Gifford Zoo Green Infrastructure Tour and Syracuse Chiefs Baseball Game in Syracuse, NY

On August 26, the Central Chapter teamed with members of SWE and AWWA for a tour or the green infrastructure at our local zoo. The zoo contains green infrastructure such as a green roofs, a duck pond, and porous pavement. After the game, attendees attended the Syracuse Chiefs baseball game, where we had our own patio and catered food.

Central Chapter of NYWEA Contact Information

Please contact Jonas Balistreri (Jonas.balistreri@arcadis-us.com)

Steve Giarrusso, of the Minoa WWTP, explaining the cutting-edge technology used.

Chris Nobel, of Noblehurst Farms, explains how he improves digester efficiency using local food waste.

Volleyball at the Summer Picnic.

Members at the Rosemond Gifford Zoo Green Infrastructure Tour.

NYWEA METROPOLITAN EVENTS

By Alexander M. Bullers, Black & Veatch

The Young Professionals (YP) committee of the New York Water Environment Association (NYWEA) Metropolitan Chapter organized several events to align with our mission statement: "To foster participation in NYWEA and increase opportunities for young professionals in the water environment industry by developing interesting programs that provide a forum for networking, continuing education, professional growth, development of leadership skills, and access to the professional community."

Shoreline Cleanup. In celebration of Earth Day, members of the committee volunteered to clean up the shoreline along the Jamaica Bay Wildlife Refuge. The refuge, located in New York City (NYC), is one of the most significant bird sanctuaries in the Northeast. Volunteers worked to restore habitats for over 330 species of migratory birds, more than 60 species of butterflies and native pollinators, and many more animals.

Technical Seminar and Networking. In late May, the NYWEA Met Chapter YP committee sponsored a technical seminar and networking event. The event drew a group of more than 50 professionals and students at Cooper Union. The program was dedicated to helping water professionals better understand NYC Department of Environmental Protection (DEP). Topics focused on several operating bureaus within NYC DEP, compliance, stormwater management programs, and water demand management programs.

More Networking! The annual summer networking event sponsored by the NYWEA Met Chapter YP committee was held at Bohemian Hall & Beer Garden in Astoria, Queens. Over 100 young and experienced professionals attended this event. Having such a strong attendance of both young and experienced professionals gave everyone the opportunity to mingle with and meet a variety of water professionals.

YP CONTINUED SUCCESS

(Continued from front page.)

I can say from experience that you never know where the first volunteer role will take you. I cannot say enough great things about this group. Each year I have the pleasure of meeting more amazing people, it really makes WEFTEC and other WEF events, a reunion. Each year we leave WEFTEC motivated for the upcoming year with our new ideas and visions we've shared. I hope this year will be motivation for all of our new & seasoned members to jump into anything our committee or WEF has to offer, we're made from folks like you!

One of my favorite things about the SYPC members is their desire to aim high. Our committee is one that likes to raise the bar and then get things done. I respect that and I think we have achieved that over the past two years. Thank you for supporting our committee and these activities!

Spend the Weekend at WEFTEC!

Highlights include:

Friday, September 25

- Water Palooza, event designed to increase public awareness about water related subjects

Saturday, September 26

- WEF Annual Community Service Project: Pershing Magnet School - building a rain garden & learning garden
- Jammin' 4 Water*, an open-mic amateur performance benefitting water charities

Sunday, September 27

- Student Design Competition

Monday, September 28

- Student Chapter Annual Meeting
- WEF Students & Young Professionals Committee Meeting
- Student & Young Professionals Networking & Career Fair
- Black & Veatch Student Appreciation Night
- Water for People Bash*
- WEF Young Professionals Reception

*Note: These events require an entry fee.

Don't forget to stop by the University Student Lounge

September 27 – 29
9:00 am -5:00 pm!

Complimentary light lunch and refreshments are provided Sunday and Monday, 11:30 am – 1:00 pm.

Bring business cards and resumes.

Special Student Housing Block Available at Aloft City Center!
Visit www.weftec.org/syp for more details.

weftec® 2015
the water quality event™

SEPTEMBER 26–30 | MCCORMICK PLACE | CHICAGO, IL

FREE for WEF Student Members!
Same low cost as last year for non-members.

Contact Dianne Crilley dcrilley@wef.org for registration information.

YOUNG PROFESSIONALS NETWORKING RECEPTION

Monday, September 28
8:00 – 11:00 PM

CARNIVALE

702 W Fulton St
Chicago

Here is your chance to meet and network with other young professionals from around the world. Come enjoy food and drinks provided by:

weftec 2015
the water quality event™

Your WEFTEC Badge is your ticket to this networking event.

*Please bring your ID to verify your age.
